# EVERGREEN TREES

In recent years evergreen trees have increased in popularity to such an extent that no home is complete without them. They add charm and color to the landscape, especially in winter. The dwarf types are most suitable for planting about the foundation of buildings and their use in such places adds an air of beauty and distinction unrivaled by any other class of plants.

Our evergreens are grown especially for landscape planting where well developed plants are necessary for finished effects.

They have been frequently transplanted so as to develop sufficient root growth to enable moving successfully, and have been pruned to produce a thick symmetrical growth.

**ABIES concolor** — **WHITE FIR**

A rapid growing tree of majestic proportions when mature. The color varies from a light green to almost blue. One of our finest specimen lawn trees.

Dwarf Japanese Yew

**cuspidata nana (brevifolia) DWARF JAPANESE YEW**

Without doubt this is one of the most useful and desirable of the dwarf evergreens for foundation groupings, whether planted in sun or shade. It is very slow growing and its deep, rich green foliage lies close to its short branchlets. The growth is rather unsymmetrical which makes it very picturesque.

## COLUMNAR YEW

During the past decade many new varieties of Taxus have been produced. From these new sorts, after careful trials, we consider the COLUMNAR yew, because of its distinct habits of growth a most valuable addition to the hardy yews. It grows extremely upright and narrow like the Irish juniper and can be used in many places where a narrow tree is desired and for a formal hedge, where compact line is required it has no equal. For foundation plantings it will be found most valuable.

# EVERGREEN SHRUBS

Broad-Leaved Evergreen Shrubs hold their rich green foliage all the year round. Many varieties make a beautiful showing with their magnificent blooms. Most varieties are shade-loving plants which make them ideal for foundation plantings where there is little sun. Broad-leaved evergreens are most successful when planted in groups. A mulch of Peat Moss or leaves should be maintained the year round to keep the roots, which are close to the surface, moist.

**Daphne Cneorum**
**(Note the Fibrous Root System)**

**DAPHNE cneorum** **GARLAND FLOWER**

A dwarf, bushy plant, which produces in great profusion beautiful, fragrant, rose-pink flowers in May and June, and again in the autumn. A very desirable variety for the evergreen border and rock gardens. It grows well in sun or in partial shade. The illustration on this page, made from a photograph of a plant dug in our nursery, shows the wonderful root system and generous ball of soil, which is supplied. We grow this variety in enormous quantities and have many thousand plants to offer.

**CHAPLIN'S PINK CLIMBER**

This striking novelty originated in the same nursery in which Paul's Scarlet Climber was raised. It is a cross between Paul's Scarlet and American Pillar, of strong growth, perfectly hardy, producing its large flowers, similar in size and form to Paul's Scarlet, profusely in strong trusses of from 8 to 12 flowers each, but in color a rich lively pink.

$0.75 each, $8.00 doz.

**LE REVE**

The long-wanted, absolutely hardy, unfading yellow climber. Flowers very large, semi-double, vivid golden yellow both in bud and open. Foliage dark and glossy; growth very vigorous. Superior in color to Gardenia, Goldfinch, and others of that type, and much hardier than Emily Gray.

$0.75 each, $7.50 doz.

**MME. GREGOIRE STÆCHELIN**

The long-pointed buds are crimson at first as the sepals divide, then the firm outer petals show splashes of carmine as the flower opens, with an iridescent pearl-pink inside and it is richly perfumed.

It grows 12 feet or more and has large, disease-resistant foliage. The main stem of the plant shoots upright and the long bloom-spurs stand out 18 inches at right angles, with exquisite, full, fragrant blooms. These blooms come early in June and last over a long period. $0.75 each, $8.00 doz.

**NEW DAWN. EVERBLOOMING DR. VAN FLEET**

Recently introduced under Plant Patent No. 1.

$1.50 each

**PRIMROSE, THE NEW YELLOW RAMBLER**

In color light primrose-yellow which is maintained until the petals drop. Its flowers are borne in trusses of from 2 to 5, on long stems, about 2½ inches in diameter. The plant is of vigorous climbing habit, free flowering, mid-season, and the flowers last in good condition for a long time, with healthy dark foliage.

$0.75 each, $8.00 doz.
